

GOWTHAM KUMAR D

Vellore, India 632001 | +91-6369125729 | gowthamrafi95@gmail.com | linkedin.com/in/gowthamkumard | github.com/gowthamkumarmaha2009-svg

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Data Science with hands-on experience in web development, Python, SQL, machine learning, statistical analysis and software engineering. Skilled in building scalable solutions and passionate about solving complex problems while delivering innovative solutions.

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, Scikit-learn), R, SQL, Java, C
Machine Learning	Linear/Logistic Regression, Decision Trees, Model Optimisation
Data Visualisation	Matplotlib, Seaborn, Tableau, Power BI
Database & Cloud	SQL (data extraction & manipulation), AWS
Web & App Dev	HTML, CSS, JavaScript, React, Node.js, Flutter
Statistical Concepts	Hypothesis Testing, Regression Analysis, Forecasting, EDA

EDUCATION

Vellore Institute of Technology (VIT), Vellore 2023 – 2027
B.Tech in Computer Science Engineering (Data Science) CGPA: 8.37

Cluny Matriculation Higher Secondary School 2009 – 2023
Class 12: 93% Class 11: 95%

PROJECTS

Healthcare Insurance Fraud Detection System 2024 Machine Learning · Full Stack · Python · Scikit-learn · SQL	- Engineered an end-to-end fraud detection pipeline using Logistic Regression, Decision Trees, and ensemble methods, achieving measurable improvement in prediction accuracy. - Performed data preprocessing, feature engineering, and statistical EDA on large insurance datasets. - Deployed a real-time fraud prediction web application with backend API integration, reducing manual review effort through automated scoring.
Statistical Analysis & Forecasting – Electrical Power Consumption 2024 Machine Learning · Data Visualisation · Python · Pandas · Matplotlib / Seaborn	- Trained and comparatively evaluated multiple ML models (Linear Regression, Decision Trees) on nationwide power-consumption data to forecast future usage trends. - Conducted hypothesis testing and regression analysis to identify key demand drivers. - Produced interactive dashboards and visualisations communicating complex statistical findings to non-technical audiences.
Centralized Event Management System 2023 Full Stack · SQL · Backend · Python	- Designed and implemented a relational database schema in SQL to manage event registrations, scheduling, and multi-team coordination, reducing manual errors significantly. - Applied data extraction and manipulation techniques (JOIN, aggregation, sub-queries) to generate operational reports for administrators.
Oil Craft – E-Commerce Web Platform 2023 Frontend Development · HTML · CSS · JavaScript	Built a responsive e-commerce frontend with product selection, shopping cart, and payment workflow, demonstrating attention to detail and user-centric design.

EXPERIENCE & INTERNSHIP

Plumage Solutions — Hardware Quality Intern Jun 8 – Jul 8, 2026 Incoming Quality Control & Hardware Testing · Pondicherry, India	- Performed incoming quality inspection of hardware components (laptops, All-in-One PCs, and peripherals), verifying input materials against acceptance standards and flagging non-conformities before assembly line integration. - Conducted end-to-end system testing on fully assembled units using diagnostic software and custom shell scripts at the BIOS level to validate hardware functionality, boot integrity, and component performance.
--	--

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services (2026) - IBM Advanced Generative AI — IBM (2026) - Data Science & Analytics — HP Life (2025)

LANGUAGES & INTERESTS

Languages: Tamil (Native), English (Fluent) | Interests: Analytical Problem-Solving, Behavioural Economics, Cricket
